Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Note: This is in response to an amendment filed 03/01/2007.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 7-9, 12-17, 20-27, 30-31, and 34-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wenstrom, Jr. et al. (U.S. 6,045,573) in view of Hurson (U.S. 5,833,463).

Wenstrom discloses in figures 1-5, a suture securing portion (30) coupled to a bone anchoring portion (20); wherein the suture securing portion (30) having an eyelet (90) through which a suture (150) is threaded; and furthermore, wherein the eyelet (90) is coated with titanium alloy which equivalents to the claimed invention (see col. 3, lines 23-41). However, Wenstrom does not disclose the surface finish for the anchor or the eyelet as described in the claimed invention. Hurson teaches that it is known in the surgical art to have bone anchor that has titanium anodize surface finish as recited in the claimed invention (see col. 7, line 52 thru col. 8, line 6).

As a result, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the Wenstrom's bone anchor with titanium anodize surface finish as taught by Hurson for the sole purpose of anodizing

Art Unit: 3734

bone screws is to make the surface more compatible with one and tissue and less subject to corrosion by body fluids.

Response to Arguments

3. Applicant's arguments filed 03/01/2007 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1, 17, and 31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
